

## JOINT PRESS RELEASE

DATE: 01<sup>st</sup> June 2016

### Brink's and IntelliSense.io announce strategic partnership to support the entire Mining ecosystem

Brink's and IntelliSense.io have announced a strategic partner agreement to provide the mining industry with ground breaking technology, risk and insurance solutions to improve and enhance their operations across the globe. The two companies have partnered to develop and operate a remote monitoring and optimisation centre in Chile, with a focus on Latin American mining operations.

"By combining our 155+ years of expertise in security and global transport with IntelliSense.io's state-of-the-art technical solution we believe we will help drive both operational, environmental and production improvements at the mine site, while enhancing and simplifying the mines insurance programmes," stated Oliver Buckle-Wright, Director, Strategy & Business Development Brink's Global Services.

Sam G. Bose, CEO of IntelliSense.io added, "The solution flows through the entire pit-to-port value chain for mining companies. Within the backdrop of an uncertain commodities market, we are combining best-in-class technology to mitigate operational risk with Brink's insurance solution to deliver an integrated Operational and Financial risk management solution. The technical solution is delivered through a NO CAPEX model, enabling mining companies to align benefit realisation with operating cost and also reduce environmental impact at the site".

The goal of the partnership is provide innovation to the mining industry allowing them to realise increased profitability and efficiency at mine sites while reducing their risk exposure.
